

DEKLEY

pedal steel guitars

steppin UP with dekley pedals

Dekley is the newest most important name on the horizon today. The exciting new Dekley Pedal Steel Guitar has been designed to let you sound your best — go as far as your talents will range — lets you innovate.

That's because the new Dekley is engineered to give you tonal characteristics, sustain and durability never before available. Crisp, clean and sustaining best describes Dekley Guitars.

Only Dekley uses a PAKKAWOOD body, the aerospace alternative to natural wood and aluminum. Lighter and stronger than aluminum, more durable and consist-

Available woodgrains / Birdseye Maple, Walnut, Rosewood

ent than natural wood, PAKKAWOOD adds a new dimension to your pedal steel sound, because the thermoset wood veneers hold the same density throughout the board, eliminating those unwanted "dead spots." PAKKAWOOD holds only one-fifth the moisture of natural wood, therefore, Dekley guitars detune less because the body expands and contracts less. Liquid and heat won't faze PAKKAWOOD, so your Dekley will retain its brilliant finish, yet be tough enough to withstand the roughest treatment.

Dekley makes extensive use of stainless, chrome and cadmium-plated steel in key areas for added tonal quality and mechanical precision. Stack-stamped steel parts is a Dekley innovation. So are chrome-plated wraparound end caps for lasting beauty and scuff resistance. Dekley's exclusive quick-disconnect cross shaft assemblies will enable you to change the configuration of your pedals in about fifteen minutes flat! Dekley pedal steel guitars are backed up with a one-year original owner guarantee.

To sound your best, step up to the quality, the beauty, the sound of a Dekley pedal steel guitar.
